Global Elements and Visual Design

Story	Description	Acceptance Criteria	Fields & Data Type	Validations
US-01 Global header	As a visitor, I want a header with logo, menu and Request a Demo button on every page, so that I can navigate or book a demo from anywhere.	1. Logo on the left links to Home. 2. Menu in order: Features, Benefits, Who It Is For, How It Works, Customers, Resources, About, Contact; current page highlighted. 3. Request a Demo button on the right, accent colour, opens the demo page; clicks recorded with source page. 4. Small "Customer support" text link opens the external support site in a new tab. 5. Header stays fixed while scrolling on all devices. 6. On mobile the menu collapses behind a menu icon; the demo	Logo – Image (SVG/PNG), Req Logo alt text – Text (100), Req Menu item label – Text (30), Req Menu item link – URL, Req Menu order – Number, Req Demo button label – Text (25), Req Support link URL – URL, Req	Logo SVG/PNG, max 200 KB Max 8 menu items Menu links must point to published pages URLs must be valid https

Story	Description	Acceptance Criteria	Fields & Data Type	Validations
		button stays visible; menu works by keyboard. 7. Labels, links and order are editable without a developer.		

Story	Description	Acceptance Criteria	Fields & Data Type	Validations
US-02 Global footer	As a visitor, I want a footer with links, contact details and legal information, so that I can find anything or reach the company from the bottom of any page.	1. Shows logo and one-line package description. 2. Quick links to every main page and the AppExchange listing (opens in a new tab). 3. Email (opens mail app), phone (tap-to-call) and office address. 4. Social icons open profiles in a new tab and have screen-reader labels. 5. Links to Privacy Policy, Terms of Use, Cookie Notice and Cookie settings. 6. Copyright line shows the current year automatically. 7. A smaller Request a Demo prompt opens the demo page.	Package description – Text (150), Req Quick link label – Text (30), Req Quick link URL – URL, Req AppExchange URL – URL, Req Email – Email, Req Phone – Phone (+91), Req Office address – Long text (300), Req Social network – Dropdown (LinkedIn, Facebook, Instagram, X, YouTube) Social profile URL – URL Copyright holder – Text (100), Req Demo prompt text – Text (80), Req	Valid email format Phone: +91 followed by 10 digits URLs must be valid https Description max 150 characters

Story	Description	Acceptance Criteria	Fields & Data Type	Validations
US-03 Floating chat or WhatsApp button	As a visitor not ready for a demo, I want a small chat or WhatsApp button, so that I can ask a quick question.	1. Fixed at the bottom-right corner of every page. 2. Opens live chat, or WhatsApp with the sales number and a prefilled greeting. 3. Does not cover the cookie banner or form buttons on mobile. 4. Clicks are recorded.	Help channel – Dropdown (Live chat, WhatsApp), Req WhatsApp number – Phone (+91), Req if WhatsApp Greeting – Text (200) Show on pages – Multi-select, Req	WhatsApp number: +91 followed by 10 digits Greeting max 200 characters

Story	Description	Acceptance Criteria	Fields & Data Type	Validations
US-04 Visual design system	As the business owner, I want one consistent visual style, so that the site looks professional and the demo button always stands out.	1. One primary colour, one accent colour (used only for Request a Demo), neutral greys and white, defined once and reused. 2. One font family; large headings; body text at least 16px. 3. One Request a Demo button style (colour, shape, size, hover and focus states) used everywhere. 4. One line-icon style; decorative icons hidden from screen readers. 5. Only subtle fade-ins and hover effects, switched off when the device asks for reduced motion. 6. Generous white space; pages not cluttered.	Primary colour – Text (hex), Req Accent colour – Text (hex), Req Neutral greys – Text (hex list), Req Font family – Text, Req Type scale – Number (px per level), Req Icon – Image (SVG), Req Icon label – Text (50)	Valid 6-digit hex codes Contrast meets WCAG AA (4.5:1 normal, 3:1 large text) Body text not below 16px Animation max 400 ms Icons must be SVG

Story	Description	Acceptance Criteria	Fields & Data Type	Validations
US-05 Imagery and Salesforce brand use	As a prospective customer, I want real product screenshots and genuine real estate photos, shown within Salesforce's brand rules, so that the site feels trustworthy.	1. Product screenshots shown in simple device frames, with realistic sample data and no real customer information. 2. Photos show real homes, buildings and sales teams; no obviously staged stock images. 3. Every image has alt text and is compressed for fast loading. 4. Salesforce name, logo, "Built on Salesforce" mark and AppExchange badge follow Salesforce's brand guidelines and appear only where permitted. 5. A brand-compliance review is recorded before launch.	Image – Image (PNG/JPG/WebP), Req Image type – Dropdown (Screenshot, Photo), Req Device frame – Dropdown (Desktop, Tablet, Phone, None) Alt text – Text (150), Req Caption – Text (120) Usage rights confirmed – Checkbox, Req for photos	Screenshots min 1600px wide Photos max 300 KB after compression Cannot publish without alt text Photo cannot publish until usage rights ticked Salesforce marks must not be altered or recoloured

Home Page

Story	Description	Acceptance Criteria	Fields & Data Type	Validations
US-06 Home hero and trust strip	As a first-time visitor, I want a clear promise, the product and proof of trust at the top of the Home page, so that I understand and trust the package within seconds.	1. Large headline (e.g. "Manage every lead, sale and booking in one place, on Salesforce") and one supporting sentence. 2. Two buttons: Request a Demo (main, accent colour) and See Features (secondary). 3. Large product screenshot or short muted video beside or behind the text; stacks below the text on mobile. 4. Trust strip below: customer or partner logos, "Built on Salesforce" mark, AppExchange link, star rating and review count. 5. Optional headline numbers appear only when entered. 6. All content is editable by the business team.	Headline – Text (90), Req Supporting sentence – Text (180), Req Button labels – Text (25), Req Hero media type – Dropdown (Screenshot, Video), Req Hero image or video – Image / Video (MP4), Req Poster image – Image, Req if video Customer logo – Image, Req Company name – Text (80), Req Logo permission – Checkbox, Req AppExchange rating – Number (0.0–5.0) Review count – Number Rating last checked – Date Headline number – Text (15) + label Text (40)	Headline max 90, sentence max 180 characters Video max 10 MB with poster image Logo cannot publish without permission 3 to 12 logos Rating 0.0–5.0, one decimal; hidden if last checked over 90 days ago

Story	Description	Acceptance Criteria	Fields & Data Type	Validations
US-07 Home content sections	As a prospective customer, I want the Home page to show what the package covers, its benefits, how it works and what customers say, so that I am persuaded to request a demo.	1. Three core cards (Lead, Sales, Booking Management), each with icon, one-line description and screenshot, linking to that area on the Features page. 2. Three or four benefits, each with a simple picture, linking to the Benefits page. 3. Enquiry-to-booking visual with four stages: enquiry arrives, rep follows up, deal progresses, unit is booked. 4. Four-step how-it-works: Book a demo, We set it up, Your team is trained, Go live; links to How It Works. 5. Two or three testimonials with name, photo and company. 6. Coloured closing band with short message	Card title – Text (40), Req Card description – Text (120), Req Card icon, screenshot – Image, Req Benefit title – Text (50), Req Benefit text – Text (140), Req Journey / step title – Text (40), Req Testimonial quote – Text (300), Req Customer name – Text (80), Req Company – Text (100), Req Customer photo – Image, Req Testimonial permission – Checkbox, Req Closing message – Text (100), Req	Exactly 3 core cards 3–4 benefits; exactly 4 journey stages and 4 steps 2–3 testimonials; none published without permission Quote max 300 characters

Story	Description	Acceptance Criteria	Fields & Data Type	Validations
		and Request a Demo button. 7. Sections stack in this order on mobile; all content editable.		

Features and Benefits Pages

Story	Description	Acceptance Criteria	Fields & Data Type	Validations
US-08 Features page layout and Salesforce fit	As a visitor, I want a Features page I can navigate easily, including how the package fits Salesforce, so that I find the area I care about quickly.	1. Short introduction at the top. 2. Sticky side menu (desktop) or tabs (mobile): Lead Management, Sales Management, Booking Management, Reports and Dashboards, Works on Salesforce. 3. The area in view is highlighted; each area has its own link address (e.g. /features#lead-management). 4. Works on Salesforce section explains mobile access and fit with the company's Salesforce in plain language, with the "Built on Salesforce" message and AppExchange link where permitted.	Page introduction – Text (300), Req Menu label – Text (40), Req Works on Salesforce text – Rich text (800), Req AppExchange URL – URL	Introduction max 300 characters URL must be valid https

Story	Description	Acceptance Criteria	Fields & Data Type	Validations
		5. Request a Demo button at the end of the page.		

Story	Description	Acceptance Criteria	Fields & Data Type	Validations
US-09 Feature area sections	As a real estate sales leader, I want each feature area explained with real screens, so that I see exactly what the package does for leads, sales, bookings and reporting.	1. Lead Management: capture from every source, assignment, follow-ups, site visits; lead list, lead record and lead-journey graphic. 2. Sales Management: pipeline, offers and deal progress, who is closing what; pipeline, deal stage and team performance screens. 3. Booking Management: availability, holding and booking units, booking status, payment milestones; availability and booking screens and booking-journey graphic. 4. Reports and Dashboards: dashboard screens with numbers readable on every device.	Feature area – Dropdown (Lead, Sales, Booking, Reports), Req Feature title – Text (60), Req Description – Text (300), Req What this means for you – Text (150), Req Icon or screenshot – Image, Req Alt text – Text (150), Req Display order – Number, Req	Description max 300, benefit sentence max 150 characters Each area needs at least one feature to publish

Story	Description	Acceptance Criteria	Fields & Data Type	Validations
		5. Each feature shows icon or screenshot, title, 2–3 line description and a "what this means for you" sentence. 6. A Request a Demo button after each area opens the demo form with that area pre-ticked. 7. Feature names and wording are editable.		

Story	Description	Acceptance Criteria	Fields & Data Type	Validations
US-10 Benefits page	As an owner, manager or admin, I want benefits explained in business terms for my role, with a before-and-after view, so that I see the value for me.	1. Benefits grouped by role: Sales head, Sales executive, Owner or director, Salesforce admin. 2. Each benefit has a bold headline, short explanation and, where supplied, a proof number (e.g. "Faster lead response"). 3. Before vs After comparison: spreadsheets and scattered tools against the package; stacks with labels on mobile. 4. Request a Demo button at the end.	Role – Dropdown (4 roles above), Req Benefit headline – Text (60), Req Benefit explanation – Text (250), Req Proof figure – Text (20) Proof approved – Checkbox Comparison topic – Text (50), Req Before text, After text – Text (150), Req	Proof figure cannot publish unless approved Each role needs at least one benefit 3–8 comparison rows

Story	Description	Acceptance Criteria	Fields & Data Type	Validations
US-11 Savings calculator	As an owner or director, I want to enter a few numbers about my team, so that I see an estimate of time saved and deals recovered.	1. Visitor enters sales team size and leads per month (and optional average deal value in ₹). 2. Shows estimated hours saved and deals recovered per month, updating instantly. 3. A short note explains the assumptions. 4. Request a Demo button beside the result. 5. Business team can change the formula factors without a developer.	Sales team size – Number, Req Leads per month – Number, Req Average deal value – Number (₹) Time saved per lead – Number (minutes), admin, Req Lead recovery rate – Number (%), admin, Req Assumptions note – Text (300), Req	Team size: whole number 1–5,000 Leads: whole number 1–10,00,000 Deal value positive if entered Recovery rate 0–100 Blank or invalid input shows a friendly message, no result

Who It Is For, How It Works, Security and Salesforce Fit

Story	Description	Acceptance Criteria	Fields & Data Type	Validations
US-12 Who It Is For page	As a developer, brokerage or sales manager, I want a section about my type of business, so that I see the package solves my daily problems.	1. Three sections: Developers and builders; Brokerages and agencies; Sales and management teams. 2. Each describes the typical daily challenge and how the package solves it, with a matching screenshot. 3. Each has a Request a Demo button that presets "Type of company" on the demo form where it applies.	Audience – Dropdown (Developers and builders, Brokerages and agencies, Sales and management teams), Req Section title – Text (60), Req Challenge text – Text (400), Req Solution text – Text (400), Req Screenshot – Image, Req Alt text – Text (150), Req	Challenge and solution max 400 characters each All three audiences must exist to publish

Story	Description	Acceptance Criteria	Fields & Data Type	Validations
US-13 How It Works page	As an owner or Salesforce admin, I want to see each step from demo to go-live and what each involves, so that I can plan the rollout.	1. Visual step-by-step journey from "Request a demo" to "Go live", with an estimated time per step. 2. Horizontal on desktop, vertical on mobile. 3. Short plain-language blocks on installation, set-up, training, data migration from spreadsheets or other tools, and ongoing support. 4. Request a Demo button at the end.	Step name – Text (40), Req Step explanation – Text (150), Req Estimated duration – Text (30), Req Step order – Number, Req Onboarding topic – Dropdown (Installation, Set-up, Training, Data migration, Support), Req Topic summary – Text (200), Req Topic detail – Rich text (1,000)	3–7 steps Duration mandatory for every step All five onboarding topics need a summary

Story	Description	Acceptance Criteria	Fields & Data Type	Validations
US-14 Security and Salesforce Fit page	As a Salesforce admin or IT manager, I want clear facts on fit, data, access, editions and installation, plus a way to ask technical questions, so that I can complete our review.	1. Plain-language explanation of how the package works within the company's Salesforce and where data is kept. 2. How access is controlled and data is protected. 3. List of supported Salesforce editions and short installation steps. 4. Links to the AppExchange listing, support and documentation; AppExchange rating shown where permitted. 5. Short IT checklist, printable or downloadable as PDF. 6. "Ask a technical question" form sends to the technical team, shows a thank-you message and emails an acknowledgement. 7. Request a Demo button at the end.	Fit and data text – Rich text (1,500), Req Access and protection text – Rich text (1,500), Req Supported edition – Text (50), Req Installation step – Text (200), Req Checklist item – Text (150), Req Checklist PDF – File (PDF) Content approved by – Text (80), Req (internal) Form: Full name – Text (80), Req Form: Work email – Email, Req Form: Company – Text (100), Req Form: Question – Long text (1,000), Req Form: Consent – Checkbox, Req	Cannot publish until approved At least one supported edition PDF max 5 MB Valid email format Question 10–1,000 characters Consent must be ticked; invisible spam check must pass

Pricing and Customer Stories

Story	Description	Acceptance Criteria	Fields & Data Type	Validations
US-15 Pricing page	As an owner or director, I want to see pricing plans or understand how pricing is set, so that I can judge the cost.	1. Business team picks a display mode: Plan cards or Contact for pricing. 2. Plan cards: 2–3 cards with plan name, who it is for, key features and price (₹) or "Contact us". 3. Contact for pricing: message that pricing depends on team size and a demo will clarify it. 4. Comparison table of what each plan includes (plan cards mode only); usable on mobile. 5. Short expandable list of pricing questions and answers. 6. Each card or the message has a Request a Demo button; the chosen plan is passed to the demo form.	Display mode – Dropdown (Plan cards, Contact for pricing), Req Plan name – Text (40), Req if cards Who it is for – Text (100), Req if cards Key features – Text list (5 × 80) Price – Number (₹) Billing period – Dropdown (Per user per month, Per year, One-time) Show "Contact us" – Checkbox Contact message – Text (250), Req if contact mode Comparison row – Text (60) + value per plan Dropdown	2–3 plans in cards mode Each plan shows a price or "Contact us", not both Price must be positive Every comparison row needs a value for every plan Max 10 pricing questions

Story	Description	Acceptance Criteria	Fields & Data Type	Validations
			(Included, Not included, Note) Pricing question – Text (150); answer – Rich text (800)	

Story	Description	Acceptance Criteria	Fields & Data Type	Validations
US-16 Customer stories and case studies	As a prospective customer, I want to browse real customer results and read short case studies, so that I see proof from companies like mine.	1. Grid of cards with customer photo, company, quote and one key result; filter by company type. 2. Clicking a card opens a case study page with Problem, Solution and Result. 3. Optional customer video on the case study, loading only when played, with captions. 4. Each case study has its own address (e.g. /customers/company-name) and ends with a Request a Demo button. 5. Only stories with recorded customer permission are shown.	Customer photo, company logo – Image, Req Customer name – Text (80), Req Company – Text (100), Req Company type – Dropdown (Developer or builder, Brokerage or agency, Other), Req Quote – Text (250), Req Key result – Text (60), Req Problem, Solution, Result – Rich text (1,500 each), Req Page address (slug) – Text (60), Req Video – Video (MP4) / URL; captions – File (VTT) Permission received – Checkbox, Req	Cannot publish without permission Slug unique; lowercase letters, numbers, hyphens Problem, Solution and Result all required Video needs captions; max 100 MB

Request a Demo

Story	Description	Acceptance Criteria	Fields & Data Type	Validations
US-17 Request a Demo page and form	As a prospective customer, I want a reassuring page with a short, easy form, so that I can request a demo in under a minute.	1. Two columns on desktop (left: headline, 3–4 bullets on what the demo covers, one testimonial, trust logos; right: form); stacked on mobile with the form first. 2. Form shows the fields listed; required fields clearly marked. 3. Friendly error messages appear next to the field on leaving it and on submit; focus moves to the first error; entered values are kept. 4. Email and phone fields open the matching mobile keyboard; autofill works. 5. Interest and company type are pre-filled when the visitor arrives from a related button; chosen pricing plan is stored.	Full name – Text (80), Req Work email – Email, Req Country code – Dropdown, Req, fixed default +91 (India) Phone number – Phone, Req Company name – Text (100), Req Job title / role – Text (80) Type of company – Dropdown (Developer or builder, Brokerage or agency, Other) Sales team size – Dropdown (1–10, 11–50, 51–200, 200+) Use Salesforce today? – Dropdown (Yes, No, Evaluating)	Name 2–80 characters; letters, spaces, apostrophe, hyphen, full stop Email valid format (name@domain.tld) Phone: exactly 10 digits, starting 6, 7, 8 or 9 (Indian mobile) Company 2–100 characters Preferred date: not today or past, max 60 days ahead, weekdays only Time slot required if date chosen Anything else max 500 characters with counter Consent must be ticked Spam: hidden honeypot must be empty; max 5 submits per address per 10 minutes All text trimmed of leading and trailing spaces

Story	Description	Acceptance Criteria	Fields & Data Type	Validations
		6. Invisible spam check on submit; no puzzle for genuine visitors. 7. On success the form is replaced by "Thanks! We'll contact you within one business day." and what happens next; submission recorded as a conversion; double submit prevented.	Most interested in – Multi-select (Lead, Sales, Booking Management, Reports and Dashboards) Demo type – Dropdown (Online, In-person) Preferred date – Date Preferred time slot – Dropdown (10–12, 12–2, 2–4, 4–6 IST) Anything else – Long text (500) Consent to be contacted – Checkbox, Req Plan of interest, source page, campaign – Text (hidden)	

Story	Description	Acceptance Criteria	Fields & Data Type	Validations
US-18 Demo emails: confirmation, sales alert and reminders	As a visitor and as a sales team member, I want automatic emails after a demo request and before the demo, so that the visitor has a record, sales can act fast and fewer demos are missed.	1. Visitor confirmation sent within 5 minutes with request summary, next steps, contact details and Privacy Policy link. 2. Sales notification sent within 1 minute to configured addresses with every field, time, source page and campaign. 3. Reminders sent 24 hours and 1 hour before a booked demo, with meeting link or address and reschedule/cancel links; none sent after cancellation. 4. Templates, recipients and reminder timings are editable by the business team.	Sender name – Text (60), Req Sender email – Email, Req Email subject – Text (100), Req Email template – Rich text with merge fields, Req Sales recipients – Email (list), Req Reminder timing – Number (hours before), Req	Sender on a verified company domain At least one valid sales recipient Template must include recipient name merge field Reminder timing 1–72 hours

Story	Description	Acceptance Criteria	Fields & Data Type	Validations
US-19 Save demo request as Salesforce lead	As a sales team member, I want every demo request created as a lead in our Salesforce automatically, so that no one copies details by hand.	1. Each valid submission creates a Lead within 1 minute, Lead Source "Website – Demo Request". 2. Fields are mapped as listed. 3. If a Lead or Contact with the same email exists, the request is attached to it instead of creating a duplicate. 4. If Salesforce is unavailable the request is queued and retried; an alert is sent after 3 failures; no submission is lost.	Full name → First Name, Last Name (Text) Work email → Email (Email) +91 + phone → Phone (Phone) Company name → Company (Text) Job title → Title (Text) Type of company, team size, uses Salesforce, demo type → custom Picklists Most interested in → custom Multi-select picklist Preferred date and slot → custom Date/Time Anything else → Description (Long text)	Name split on last space; single word goes to Last Name Picklist values must match Salesforce values exactly Phone stored in +91XXXXXXXXXX format

Story	Description	Acceptance Criteria	Fields & Data Type	Validations
			Consent, consent date → custom Checkbox, Date/Time Source page, campaign → custom Text	
US-20 Self-service demo slot booking	As a prospective customer, I want to pick a demo slot from the sales team's calendar, so that I avoid back-and-forth emails.	1. Form shows available slots from the sales team's live calendar in IST. 2. Choosing a slot books it, blocks it in the rep's calendar and sends a calendar invite to visitor and rep. 3. Online demos include a meeting link; in-person demos include the office address. 4. Invite has reschedule and cancel links; booking details are added to the Salesforce lead.	Selected slot – Date and time, Req when booking Assigned rep – Text (system) Slot length – Number (minutes), admin, default 30	Only slots at least 4 hours ahead A taken slot cannot be booked; visitor asked to pick another

Resources and FAQ

Story	Description	Acceptance Criteria	Fields & Data Type	Validations
US-21 Resource library and release updates	As a visitor, I want articles, guides, sales tips and release updates in one place that I can read and share, so that I learn at my own pace and see the product is actively improved.	1. Resources page lists items as cards (image, type, title, date, summary), newest first, 12 per page. 2. Filter by type: Article, Guide, Sales tip, Release update, Download. 3. Each item has its own page ending with a Request a Demo prompt. 4. A "What's new" view lists release updates newest first with version, date and highlights; linked from the footer. 5. Share buttons for LinkedIn, X, Facebook, WhatsApp, email and copy link; share previews show title, summary and image. 6. Editors can draft, preview, publish and	Title – Text (90), Req Resource type – Dropdown (5 types above), Req Summary – Text (200), Req Body – Rich text, Req Cover image – Image, Req Author – Text (80) Publish date – Date, Req Page address (slug) – Text (80), Req Status – Dropdown (Draft, Published, Unpublished), Req Version number – Text (20), Req for release updates	Slug unique; lowercase letters, numbers, hyphens Publish date required when Published Version number unique Share image min 1200 × 630 px

Story	Description	Acceptance Criteria	Fields & Data Type	Validations
		unpublish without a developer.		
US-22 Gated downloads and newsletter signup	As a visitor not yet ready for a demo, I want to download guides and subscribe to the newsletter, so that I get useful material, and the sales team gets a lead.	1. Gated guides and brochures open a short form; after a valid submit the file downloads and a link is emailed. 2. Each download creates a Salesforce lead with Lead Source "Website – Download" and the file name. 3. Newsletter box on Resources pages; double opt-in confirmation email; confirmed subscribers added to the email tool and Salesforce. 4. Every newsletter has an unsubscribe link.	Work email – Email, Req Full name – Text (80) Company name – Text (100) Consent – Checkbox, Req Download file – File (PDF), Req (editor) Gated – Checkbox, Req (editor)	Valid email format Consent must be ticked PDF max 20 MB Already-subscribed email shows "You're already subscribed" Invisible spam check must pass

Story	Description	Acceptance Criteria	Fields & Data Type	Validations
US-23 FAQ page	As a prospective customer, I want FAQs grouped by topic with search, so that I quickly find my answer.	1. Topics: Product, Salesforce requirements, Set-up, Data migration, Pricing, Security, Support. 2. Answers expand and collapse by click or keyboard. 3. Search box at the top filters questions and answers as the visitor types, highlighting matches. 4. No results shows links to Contact Us and Request a Demo. 5. Page ends with "Still have questions? Request a demo or contact us." 6. Business team can add, edit, reorder and remove FAQs.	Topic – Dropdown (7 topics above), Req Question – Text (150), Req Answer – Rich text (1,500), Req Display order – Number, Req Status – Dropdown (Draft, Published), Req Search term – Text (100), visitor input	No duplicate question within a topic Search starts after 2 characters; ignores case and extra spaces

About Us, Contact Us and Legal

Story	Description	Acceptance Criteria	Fields & Data Type	Validations
US-24 About Us page	As a prospective customer or Salesforce partner, I want to know who is behind the package and their track record, so that I can trust the company.	1. Company story, mission statement and values (title plus one line each). 2. Leadership team with photo, name, role, short bio and optional LinkedIn link. 3. Milestones timeline, oldest to newest; horizontal on desktop, vertical on mobile. 4. Awards, certifications, Salesforce partner status and media mentions (media mentions link to the article). 5. Careers link.	Company story – Rich text (2,000), Req Mission – Text (250), Req Value title – Text (40); explanation – Text (150), Req Leader photo – Image, Req Leader name, role – Text (80), Req Leader bio – Text (400), Req LinkedIn URL – URL Milestone date – Date (month/year), Req; title – Text (60), Req Credential type – Dropdown (Award, Certification, Partner status, Media mention), Req	3–6 values Bio max 400 characters LinkedIn URL must start with https://www.linkedin.com/ Milestone date not in the future Media mentions must have a link

Story	Description	Acceptance Criteria	Fields & Data Type	Validations
			Credential title, issuer – Text (100), Req; link – URL; badge – Image Careers URL – URL, Req	

Story	Description	Acceptance Criteria	Fields & Data Type	Validations
US-25 Contact Us page	As a visitor, I want a contact form and all contact options in one place, so that I can reach the company the way I prefer.	1. Contact form with name, email, phone, topic and message; friendly inline errors; thank-you message and acknowledgement email. 2. Message goes to the inbox for the chosen topic and is saved in Salesforce (Lead for Sales/Partnership, Case for Support). 3. Email, phone, WhatsApp, office address(es) and business hours; tap-to-call and WhatsApp work on mobile. 4. Embedded map per office with "Get directions"; a static image shows until map cookies are accepted. 5. Social media links open in a new tab.	Full name – Text (80), Req Email – Email, Req Phone – Phone (+91) Topic – Dropdown (Sales, Technical, Partnership, Support, Other), Req Message – Long text (1,500), Req Consent – Checkbox, Req Office name – Text (60); address – Long text (300), Req Business hours – Text (100), Req Latitude, longitude – Number (decimal), Req	Name 2–80 characters Valid email format Phone if entered: 10 digits starting 6–9 Message 10–1,500 characters Consent must be ticked; invisible spam check must pass Latitude −90 to 90; longitude −180 to 180

Story	Description	Acceptance Criteria	Fields & Data Type	Validations
US-26 Legal pages and form privacy notices	As a visitor, I want clear legal pages and a privacy notice next to every form, so that I know how my data is used before I share it.	1. Privacy Policy (/privacy-policy), Terms of Use (/terms-of-use) and Cookie Notice (/cookie-notice) pages, with text from the legal team and a "Last updated" date. 2. All three linked from the footer. 3. Every form shows a short privacy notice with a Privacy Policy link next to the submit button. 4. Consent tick boxes are unticked by default; consent wording and timestamp are stored with each submission.	Page title – Text (70), Req Legal text – Rich text, Req Last updated – Date, Req Approved by legal – Checkbox, Req Form privacy notice – Text (250), Req Consent wording – Text (250) Consent timestamp – Date and time (system)	Legal page cannot publish unless approved Last updated not in the future Form cannot publish without a privacy notice

Story	Description	Acceptance Criteria	Fields & Data Type	Validations
US-27 Cookie consent banner	As a first-time visitor, I want to choose which cookies I accept, so that I control how I am tracked.	1. Banner on first visit: Accept all, Reject non-essential, Manage preferences. 2. Preferences let the visitor switch Analytics and Marketing on or off; Essential always on. 3. Analytics and marketing scripts load only after consent. 4. Choice remembered for 12 months; reopened from "Cookie settings" in the footer. 5. Links to the Cookie Notice; usable by keyboard.	Banner text – Text (300), Req Analytics consent – Checkbox Marketing consent – Checkbox Consent timestamp – Date and time (system) Consent duration – Number (months), Req	Non-essential categories off until chosen Duration 1–12 months

Additional Features

Story	Description	Acceptance Criteria	Fields & Data Type	Validations
US-28 Product video and interactive tour	As a visitor, I want to watch a short product video and click through the product screens, so that I understand and "try" the package before a demo.	1. Video or animated walkthrough on Home and Features; poster image first, loads only when played, captions available. 2. Guided click-through tour of Lead, Sales and Booking Management screens with hotspots and short captions. 3. Tour moves by buttons, arrow keys or swipe, shows progress (e.g. 3 of 12) and ends with Request a Demo. 4. Video plays and tour completions are recorded. 5. Business team can replace video, screenshots and captions.	Video – Video (MP4) / URL, Req Poster image – Image, Req Captions – File (VTT), Req Tour area – Dropdown (Lead, Sales, Booking), Req Step screenshot – Image, Req Hotspot position – Number (x %, y %), Req Step caption – Text (150), Req Step order – Number, Req	Video max 3 minutes; cannot publish without captions Hotspot values 0–100 Max 20 steps per tour area

Story	Description	Acceptance Criteria	Fields & Data Type	Validations
US-29 Free trial and event registration	As a prospect not ready for a demo, I want to request a free trial or register for a webinar or event, so that I can learn more on my own terms.	1. "Request a free trial" form on Features and Pricing pages; shows what happens next and expected timing. 2. Events page lists upcoming webinars and events with title, date, time (IST), format and description; past events listed separately with optional recording. 3. Event registration sends a confirmation email with calendar invite. 4. Every trial request or registration creates a Salesforce lead tagged "Trial request" or the event name, and notifies sales.	Full name – Text (80), Req Work email – Email, Req Phone – Phone (+91), Req for trial Company name – Text (100), Req Salesforce org type – Dropdown (Production, Sandbox, No Salesforce yet), Req for trial Consent – Checkbox, Req Event title – Text (90), Req (editor) Event date and time – Date and time, Req (editor) Format – Dropdown (Webinar, In-person), Req (editor) Capacity – Number (editor)	Valid email format Phone: 10 digits starting 6–9 Consent must be ticked; invisible spam check must pass Registration closes at start time or when capacity is reached Same email cannot register twice for one event

Story	Description	Acceptance Criteria	Fields & Data Type	Validations
US-30 Multi-language support	As a visitor who prefers another language, I want to view the site in my language, so that I understand it fully.	1. Language switcher in header and footer; choice remembered. 2. Every page, form message and email can be translated by the business team. 3. Untranslated pages fall back to English. 4. Each language has its own page addresses (e.g. /hi/features).	Language – Dropdown (English plus chosen languages), Req Translated content – Text per content field Language active – Checkbox, Req	A language cannot be activated until header, footer, Home and Request a Demo are translated
US-31 Comparison page	As an owner or director, I want to compare the package with spreadsheets and other tools, so that I can justify the decision internally.	1. Comparison table: the package vs spreadsheets vs other tools, across agreed criteria. 2. Every claim approved by the business team before publishing. 3. Request a Demo button at the end.	Criterion – Text (60), Req Package / Spreadsheets / Other tools value – Text (80), Req Claims approved – Checkbox, Req	Cannot publish unless claims approved Named competitors only with legal approval

Story	Description	Acceptance Criteria	Fields & Data Type	Validations
US-32 Exit-intent offer	As the business owner, I want visitors about to leave to be offered the demo or a guide, so that we recover some of them.	1. On desktop, a pop-up appears when the pointer moves to leave the page. 2. Shown at most once per visit; never on Request a Demo or while a form is being filled. 3. Closes with a button, Escape key or click outside; works with screen readers.	Headline – Text (60), Req Text – Text (150), Req Offer type – Dropdown (Demo, Guide), Req Active – Checkbox, Req Excluded pages – Multi-select	Request a Demo page always excluded

Experience and Platform Requirements

Story	Description	Acceptance Criteria	Fields & Data Type	Validations
US-33 Responsive and mobile-friendly site	As a visitor on any device, I want every page to look and work well on my phone, tablet or desktop, so that I can evaluate the package anywhere.	1. Pages adapt from 360px phones to desktop with no sideways scrolling and logical content order. 2. Buttons and links at least 44 × 44px with space between them. 3. Email, phone and number fields open the matching mobile keyboard; autofill works. 4. Product screenshots use a mobile crop or tap-to-zoom so text stays readable. 5. Tested on current iOS Safari, Android Chrome and desktop Chrome, Safari, Edge and Firefox.	Mobile crop image – Image (per screenshot)	Mobile crop min 720px wide

Story	Description	Acceptance Criteria	Fields & Data Type	Validations
US-34 Fast pages and loading feedback	As a visitor, I want pages to open quickly and to see when something is loading, so that I don't give up and leave.	1. Images and videos resized, compressed, in modern formats, and loaded as the visitor scrolls. 2. Main content visible within 2.5 seconds on a typical 4G phone (proposed target, to confirm). 3. Home, Features and Request a Demo score 90+ for mobile performance in Google Lighthouse (proposed target, to confirm). 4. A loading indicator shows for any action over 0.5 seconds (form submit, calendar slots); failures show a friendly message with retry.	None	Uploaded images over 500 KB are auto-compressed or rejected with a message

Story	Description	Acceptance Criteria	Fields & Data Type	Validations
US-35 Accessibility and plain language	As a visitor with low vision, a screen-reader user, a keyboard-only user or a non-technical owner, I want the site to be accessible and clear, so that I can use it fully and reach the demo form easily.	1. Text meets WCAG 2.1 AA contrast; usable at 200% zoom; colour never the only signal. 2. Meaningful images have alt text; decorative images hidden from screen readers; videos captioned. 3. Everything works by keyboard in a logical order with a visible focus and a "Skip to main content" link. 4. Plain, jargon-free wording; Salesforce terms explained inline or by tooltip (hover, tap and focus). 5. The demo form is reachable within one or two clicks from every page, verified before launch.	Alt text – Text (150), Req per image Decorative – Checkbox Glossary term – Text (40), Req Plain-language explanation – Text (200), Req	Image cannot publish without alt text unless marked decorative Glossary terms unique

Story	Description	Acceptance Criteria	Fields & Data Type	Validations
US-36 Site security and data protection	As a visitor sharing my details, I want a secure site that protects my data, so that I can trust it with my information.	1. All pages served over HTTPS with a valid, auto-renewed certificate; http redirects to https. 2. Form submissions stored encrypted. 3. Only authorised roles can view or export submissions; every view and export is logged. 4. Submissions older than the agreed retention period are deleted automatically.	User role – Dropdown (Admin, Sales, Editor), Req Retention period – Number (months), Req	Editor role cannot view submissions Retention 1–60 months

Story	Description	Acceptance Criteria	Fields & Data Type	Validations
US-37 Search engine findability	As the business owner, I want every page set up for search engines, so that real estate teams searching for a Salesforce CRM find us.	1. Each page has a unique, editable search title, description and share image (defaults from page content if blank). 2. Clean, readable addresses (e.g. /features); changed addresses redirect automatically. 3. XML sitemap generated automatically; friendly "page not found" page links to Home and Request a Demo. 4. Content targets phrases such as "real estate CRM", "lead management on Salesforce", "booking management on Salesforce"; one main heading per page; structured data added.	Search title – Text (60), Req Search description – Text (160), Req Share image – Image Page address (slug) – Text (80), Req Redirect from / to – Text (255) Target search phrase – Text (60)	Title max 60, description max 160 characters Duplicate search titles show a warning Slug unique; lowercase letters, numbers, hyphens Redirect cannot loop or point to itself Exactly one main heading per page

Story	Description	Acceptance Criteria	Fields & Data Type	Validations
US-38 Tracking and performance report	As the business owner, I want visits and conversions tracked and summarised in a simple report, so that I can measure the site against its goals.	1. Tracks page visits, Request a Demo clicks (with page), form submissions, downloads, chat clicks and visits from AppExchange; campaign tags captured. 2. Tracking runs only after analytics consent. 3. Report shows demo requests per week and month, % of visitors submitting the demo form, time on Features, AppExchange visits and returning visitors. 4. Business team can view the report and pick a date range without help.	Event name – Text (50), Req Source page – URL, Req Referrer – URL Campaign tags – Text (255) Timestamp – Date and time, Req Report date range – Date (start, end), Req Report period – Dropdown (Weekly, Monthly), Req	No personal data (name, email, phone) sent to analytics End date not before start date

Story	Description	Acceptance Criteria	Fields & Data Type	Validations
US-39 Content management and demo request export	As the business team, I want to edit site content myself and view and export demo requests, so that we don't need a developer for day-to-day work.	1. Editors create, edit, preview, schedule and publish text, screenshots, testimonials, resources and FAQs. 2. Previous versions can be viewed and restored. 3. Only Admins change settings, users and integrations. 4. Admin and Sales users see a list of demo requests, newest first, filterable by date, company type, team size and interest, and searchable by name, email or company. 5. Filtered list exports to Excel (.xlsx) in one click.	User name – Text (80), Req User email – Email, Req Role – Dropdown (Admin, Editor, Sales), Req Content status – Dropdown (Draft, Scheduled, Published), Req Scheduled publish – Date and time Filters: date range – Date; company type, team size – Dropdown; interest – Multi-select; search – Text (100)	Scheduled time must be in the future User email unique Only Admin and Sales can view or export demo requests End date not before start date
